# PowerTech <sup>™</sup> M 3029HFG89 Diesel Engine

**Generator Drive Engine Specifications** 

Dimensions may vary according to options selected. Call your distributor for more information.

General data				
Model	3029HFG89	Length - mm (in) to rear of block	717 (28.2)	
Number of cylinders	3	Width - mm (in)	548 (21.6)	
Displacement - L (cu in)	2.9 (177)	Height mm (in)	927 (36.5)	
Bore and Stroke mm (in)	106 x 110 (4.17 x 4.33)	Weight, dry kg (lb)	342 (754)	
Compression Ratio	17.2 : 1			
Engine Type	In-line, 4-cycle			
Aspiration	Turbocharged and air-to-air aftercooled			

# Performance data range

Prime power is the nominal power an engine is capable of delivering with a variable load for an unlimited number of hours per year when applied in conformance with ISO 8528-1. This rating conforms to ISO3046 and SAE J1995.

Standby power is the maximum engine power available at varying load factors for up to 200 hours per year when applied in conformance with ISO 8528-1. This rating conforms to ISO 3046 and SAE J1995. The calculated generator set rating range for standby applications is based on minimum engine power (nominal -5 percent) to provide 100 percent meet-or-exceed performance for assembled standby gen-sets.

\*Electrical power is calculated from the typical generator efficiency and fan power percentages shown. Applications may vary.

# Features and benefits

#### Fixed Geometry Turbocharger

 Fixed geometry turbochargers are sized for a specific power range and optimized to provide excellent performance across the entire torque curve. They are also designed to maximize fuel economy between the engine's rated speed and peak torque.

#### Turbocharged

 In turbocharged engines, the air is pre-compressed. Due to the higher pressure, more air is supplied into the combustion chamber, allowing a corresponding increase in fuel injection, which results in greater engine output.

## Mechanical Rotary Pump

 The timing and fuel injection pressures are optimized to maximize performance and fuel economy at a given rated speed.

## 2-Valve Cylinder Head

- Cross-flow head design provides excellent breathing from a lower-cost 2-valve cylinder head.

#### Compact Size

- Horsepower/displacement ratio is best-in-class
- Lower installed cost
- Mounting points are the same as previous engine models
