

John Deere Filters

A part of great performance

JOHN DEERE

Great performance is built in

Unplanned downtime because of a filter problem? That is never OK. Our products are too big an investment to allow that kind of thing to happen. Use John Deere Filters to keep the dirt out. We offer top-of-the-line filters to help deliver superior performance season after season.

A part of the whole. The important parts.

John Deere Oil Filters. Fuel Filters. Air Filters. Hydraulic Fluid Filters. Take a good look at our filter options. We've got you covered. You'll find that simply choosing John Deere Filters can up your productivity, reduce maintenance costs and extend the life of your equipment.

John Deere Oil Filters

When it comes to oil, sludge is the number one enemy, leading to plugged filters and engine wear. That's why John Deere Oil Filters are specially designed for more dust and sludge holding capacity. Matched to your machine for optimised oil flow, all genuine John Deere Oil Filters are tested to meet or exceed original John Deere specifications.

Don't trust your equipment to anyone else. Insist on genuine John Deere Oil Filters.

Rubber gaskets specifically designed for each application.

Tighter seal than cork or plastic gaskets used by most competitors.

Nut plate with rolled threads.

Rolled threads prevent metal contamination vs. traditionally machined threads.

Heavy-duty one-piece metal end caps.

Rolled threads prevent metal contamination vs. traditionally machined threads.

Heavy-duty canister. Stronger, longer fatigue life.

Crimped spiral centre tube.

Adds strength to prevent media from collapsing and allowing particles into system.

Tight pleats and even media spacing.

Ensure even filtration for better protection.

Additional pleat lock on larger filters.

Ensure and maintains consistent and even media spacing.

**JOHN DEERE
OIL FILTERS**

**PLUS-50™ II
ENGINE OIL**

**500 HOURS FREE
OF DOWNTIME**

Plus-50™ II Premium Engine Oil

With Plus-50 II, we've taken engine oil to the next level. Designed, developed and tested specifically for John Deere engines, it reduces downtime and increases drain intervals, performing up to an amazing 500 hours.*

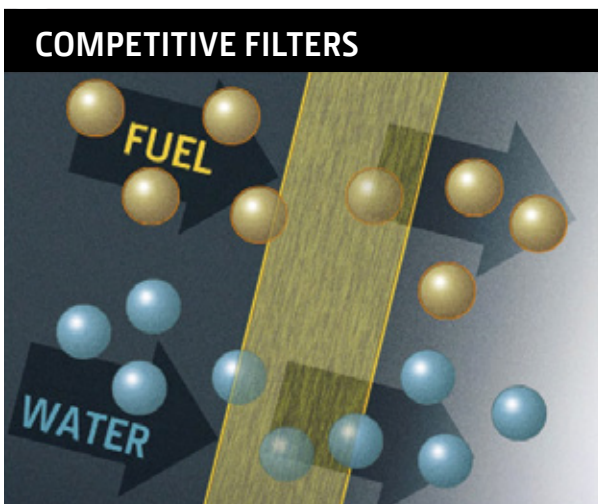

Still better than even the required standards, Plus-50 II will keep your John Deere on the job as long as you are. This Premium Engine Oil is only available at your local John Deere Dealer.

*500 hours extended drain interval applies when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan. 2. Machine operates with Plus-50 II Engine Oil API CK-4/SN. 3. Machine uses a John Deere Engine Oil Filter. 4. Machine uses only ultra low sulfur diesel fuel.

John Deere Fuel Filters

When it comes to your fuel, water is public enemy number one. Let John Deere Fuel Filters serve and protect. Not only have our fuel filters been developed to trap water, they have been tested and proven to repel it. That's because John Deere Fuel Filters are designed with a coated media that keeps water out, preventing rust and microbial growth that could damage your fuel and lead to poor fuel economy.

John Deere Hydraulic Filters

Keep contaminants out and prevent sludge and acid from damaging your hydraulic systems. Make John Deere Hydraulic Filters your first line of defence. These filters are designed specifically to protect John Deere Hydraulic Systems from component wear and hydraulic surge flow. Two big dangers your heavy-duty equipment faces during the life of your system.

The glue that binds us

With John Deere Hydraulic Filters, you can count on:

Even pleats. For a higher capacity to catch and hold contaminants. The result? Longer intervals between service checks for basic maintenance

Extra hot glue melts. To strengthen media and ensure even spacing

John Deere Air Filters

John Deere Air Filters are another high-quality line of defence against contaminants invading your engine. These filters reduce engine wear by removing dust, dirt, and other pollutants during the engine's intake of air. You'll find our filters highly efficient when it comes to trapping unwanted particles. So, breathe easy.

Clean air is not just an Act

John Deere Air Filters are on the cutting edge of design and function. With our filters, you'll get:

Even pleats and more media. To ensure high efficiency and a longer time period between service intervals

Proper airflow. The design ensures a minimum flow restriction while capturing more contaminants than leading competitive air filters

A tight seal. To keep contaminants from bypassing the filter

The really, really, really important part. Order now.

Protect your heavy-duty equipment with filters that have been designed, tested and proven for your John Deere Fleet. Keep your non-John Deere Fleet protected as well. Talk to your local John Deere dealer today.
