

9000 Series

POWERED BY PROGRESS

JOHN DEERE

PURE PERFORMANCE

The 9000 Series Self-Propelled Forage Harvesters of John Deere have been designed to deliver exceptional performance, higher efficiency and lower cost of harvest to our customers. Fuelled by our ambition to help you produce more high-quality silage more efficiently, the line-up has evolved and we have exciting news to help you boost your operation.

THE EVOLUTION OF EXCELLENCE: 9000 SERIES FORAGE HARVESTERS

When you're ready to take things to the next level, the 9000 Series is your forage harvester. Think top of the line crop analysis and documentation capabilities, peerless forage quality with an exceptionally robust kernel processor – all powered by exceptional engines, including the brand new JD18X.

EXCELLENCE EVOLVED

OVERVIEW

A lot of the productivity impact of our new 9000 Series models comes from their powerful cores – the JD18X and the Liebherr V12. But there's a lot more to say about the performance of these forage harvesters.

NEW!

HARVESTMOTION™ AND HARVESTMOTION PLUS

HarvestMotion delivers significantly higher productivity and more efficiency at reduced engine speed. HarvestMotion Plus stands for a unique torque rise and even more power at low engine speeds to boost your performance and efficiency.

2 | LOWER COST OF OPERATION

Keep costs down and productivity up with extended service intervals, less fuel usage and no DEF*.

*no DEF only for 9500, 9600, 9700 with JD18X

3 | FUNCTIONAL CAB COMFORT

Built around you, with a panoramic view, lots of space, maximum comfort, and intuitive controls and displays.

4 | OPTIMAL CROP FLOW

Think maximum throughput performance thanks to ProStream™ crop flow.

5 | EXTREME KERNEL PROCESSING

Get top-notch processing results at any length of cut with our proven Premium KP™ or the XStream KP™.

6 | HARD-WEARING DURA LINE™ PARTS

More uptime, better cost control: crop flow liners and all-crop Dura Line Plus shearbars are exceptionally long-lasting.

NEW!

7 | NEW SPOUT DESIGN

An optimised spout contour improves crop flow in sticky conditions. The covers protect harnesses and hydraulic lines for even more reliability.

8 | POWERFUL GRIP

All power to the ground: our ProDrive™ transmission and 2.15 m tyres that go down to 1 bar for less compaction to protect soil health.

9 | INTELLIGENT FORAGE MANAGEMENT

The HarvestLab™ 3000 measures and documents both dry matter and constituents in real-time for accurate silage quality analysis.

NEW!

10 | HIGH EFFICIENCY HEADERS

Choose from a header range engineered for high horsepower, including the new R Series grass pick-up for maximum throughput. Benefit from efficient, reliable operation with excellent crop handling.

11 | ALWAYS AT ITS BEST

Our Lifecycle Solutions ensure that your machine delivers maximum uptime with a measurable edge in cost of operation.

POWERFUL CORE

ENGINE 9500 | 9600 | 9700

Our new JD18X engine with HarvestMotion Plus: Boost your productivity in heavy crop conditions with up to 607 kW (814 hp) and no need for Diesel Exhaust Fluid (DEF).

2021

**DIESEL
OF THE
YEAR**

HARVESTMOTION™ PLUS

Enjoy the confidence that comes from having even more performance available when you need it – HarvestMotion Plus increases torque and power at low engine speeds.

9500-9700 HARVESTMOTION PLUS

■ 9700 Power
 ■ 9600 Power
 ■ 9500 Power
 ■ 9700 Torque
 ■ 9600 Torque
 ■ 9500 Torque

Benefit from full Final Tier 4 / Stage V compliance without diesel exhaust fluid (DEF) and get more uptime with lower costs, thanks to extended service intervals.

18 L

JOHN DEERE

JD18X

Building on years of experience, we have designed our new 18 L John Deere JD18X engine – the most powerful engine we have ever built. It delivers high performance with low specific fuel consumption. Simple and reliable. Without the need for Diesel Exhaust Fluid (DEF). We equipped it with John Deere engine controls, a high-pressure common-rail fuel system, serial turbochargers, and it features cooled EGR. Moreover, it's rear gear train significantly reduces noise, as well as torsional and crank stress.

MORE DOES MORE

ENGINE 9800 | 9900

When you need to maximise your productivity in the heaviest of crop conditions, the exceptional power of the 24.2 L Liebherr V12 engine is ready to do more for you.

The 9800 and 9900 models are equipped with a highly efficient 24.2 L Liebherr V12 engine, powering the machine with up to 712 kW (956 hp). This longitudinally-mounted engine perfects cooling efficiency with minimal fan power requirements and features excellent serviceability and weight distribution. The bottom line: improved fuel efficiency, cleaner emissions and a massive amount of power at your disposal.

24.2 L
LIEBHERR
V12

PURE PERFORMANCE – PROVEN

The renowned German Agricultural Society (DLG) thoroughly tested the performance of our 9000 Series under various harvesting conditions. Independently proven and certified.

FUEL ECONOMY 9800 (LITRES/TONNE)

"... with values below 0.5 litres/tonne of harvested crop, the measured fuel consumption values are on a very low level..."

THROUGHPUT 9800 (TONNES/HOUR)

"... with throughput values of up to 328 tonnes/hour, the tested 9800 shows its huge performance potential..."

TRIED AND TRUE

The acclaimed 24.2 L Liebherr V12 engine boasts years of outstanding field performance. Exceptional 1,000-hour service intervals deliver more uptime and lower your costs.

MACHINE EVOLUTION

The 9000 Series is a direct result of our commitment to improve the harvesting process and forage quality for our customers.

HARVESTMOTION™ AND HARVESTMOTION PLUS

A state-of-the-art engine with ideal performance characteristics and low specific fuel consumption at reduced rpm, perfectly aligned and synchronised with a superior crop flow. This is our HarvestMotion concept for pure performance and highest efficiency.

If you want to feel the confidence of having even more performance available when you need it, our HarvestMotion Plus comes as standard on the 9500, 9600 and 9700 models for an on-demand power boost.

9000 SERIES UP TO 712 KW (956 HP)

- Liebherr V12, 24.2 L
- JD18X, 18.0 L (power without boost)
- JD18X, 18.0 L (power with boost)

**ENHANCED, IMPROVED,
EVEN BETTER:**

- Engine & Cooling
- Driveline
- Cropflow
- Kernel Processing
- R Series grass pick-ups

EFFICIENCY BOOSTED

DRIVELINE

Every single component of the 9000 Series' driveline was designed to contribute to more efficiency. Crop flow components are powered to ensure the prodigious engine power available is transferred reliably to the main drive belt, and the kernel processor drive has had a significant upgrade as well. Overall fuel efficiency improves thanks to a lower driveline top speed of 1,800 rpm.

1 | PERFECT CROP FLOW

The feedrolls and the header drive ensure uniform crop intake and an unprecedented throughput per horsepower thanks to a significantly optimised crop flow.

3 | LIGHTWEIGHT MAIN CLUTCH

The main clutch design features serious weight optimisation to help reduce power losses and maximise overall fuel economy.

5 | HYDRAULICS SYSTEM ENHANCED

At its core is a sophisticated load sensing system for maximum hydraulic performance with reduced losses and less pressure if needed.

2 | ENGINE INTEGRATION

Thanks to the compact and low integration of the engines at the rear, less additional weights are needed to put power to the ground – that means better fuel efficiency on the road and less soil compaction in the field.

4 | MAIN FRAME DESIGN

The main frame is designed to accommodate larger headers and features new engine mountings for a lower centre of gravity and to provide more space for an overall stronger driveline.

6 | MAIN DRIVE DESIGN

To support the higher engine power and throughput of the 9000 Series, we reinforced the 8000 Series' renowned main drive and perfectly matched the gear ratio to the engine's power curve. For easier maintenance access we made wear parts easier to reach under the side panel.

LOWER RPM, LOWER COST

We designed the 9000 Series driveline for optimal crop flow right at the engine's sweet spot – lower engine rpm for lower fuel costs thanks to HarvestMotion™, and increased torque rise with more power from HarvestMotion Plus to achieve effortless operation at the highest efficiency.

COOLER BY DESIGN

The longitudinal layout of the 9000 Series' engines eliminates the need for the large and power-intensive cooling packages that transverse engines require: More of the engine's surface area is closer to the outer edges of the machine, unobstructed by other components. Cool air is drawn in through the channels behind the cab and is guided along the sides of the engine to the exits at the rear and the sides. That's more efficient cooling with less components.

High-efficiency crop stream –
The straightforward design
produces reliable and powerful
material transport no matter what.

PROSTREAM™: HIGH POWER, LOW FRICTION

CROP FLOW

The ProStream crop flow is designed with extra heavy-duty components for even higher engine horsepower outputs, and a throughput capacity of more than 400 tonnes per hour. The smooth, gentle arc of the channel minimises resistance for an even cropflow stream and lower wear.

1 | FAST HEADER ATTACHMENT

The self-adjusting header locking system connects the driveline automatically.

2 | WIDE PROFILE KNIFE MOUNTINGS

The knife mountings and the profile are designed to channel the crop for a more stable and even flow.

3 | PATENTED QUICK STOP SYSTEM

Within 85 ms, a patented hydraulic system instantaneously switches off the feedrolls without the stresses of traditional mechanical linkages.

4 | SMOOTH AND EVEN CROP FLOW

When you are chopping an uneven swath, our feedroll dampening system compensates and smoothes out the crop mat for even feeding and consistent length of cut.

5 | DURABLE HYDRAULIC KNIFE GRINDING SYSTEM

Our all-hydraulic system is highly vibration-resistant and adds reverse mode knife sharpening as an exclusive feature.

6 | FEEDROLL ADVANTAGE

Four feedrolls, perfectly synchronised with the header produce a smooth cropflow and springs ensure a flat crop mat for perfect cutting quality.

7 | EXTRA FINE SHEARBAR ADJUSTMENT

The adjustment pivoting point is positioned far below the shearbar, ensuring minimum horizontal change when adjusting worn out knives.

8 | 5 MINUTE KERNEL PROCESSOR CHANGE OVER

Its swing-out/swing-in design allows it to be moved out of the crop flow and to be automatically replaced with a grass chute.

9 | HIGH QUALITY, HEAVY DUTY BEARINGS

The extra strong bearings are designed for loads and throughput much higher than they'll ever have to bear.

10 | NEW SPOUT DESIGN

The optimised spout contour much improves crop flow in sticky conditions. A 20 cm longer standard configuration enhances visibility and makes trailer filling easier – ideal for pick-up use or 8-row maize heads.

ONE CUTTERHEAD, ALL CROPS

CUTTERHEAD

Our universal cutterhead is designed to perform with remarkable flexibility for potentially very different harvesting requirements.

It will meet your demands without having to compromise forage quality. Depending on your specific requirements, you can also choose from either 40, 48, 56 or even 64 knife configurations.

CUTTERHEAD						
KNIFE CONFIGURATION			40	48	56	64
Cutterhead Speed	1,170rpm	Full set	7-25 mm	6-21 mm	4-18 mm	3-16 mm
		½ set	14-50 mm	12-42 mm	8-36 mm	6-32 mm
	1,350rpm	Full set	-	-	4-16 mm	3-14 mm
		½ set	-	-	8-32 mm	6-28 mm

SMOOTH CROPFLOW

To further refine the crop flow, we analysed it with the latest high-speed video technology and gained unprecedented insight to engineer from. The large diameter 670 mm drum creates a faster cropflow which makes a big difference when the harvester is working at extra short cut lengths. The net result is higher throughput with lower power consumption.

HIGH EFFICIENCY CUTTING

The combination of the knife holder design and long knives, with a 20 mm tungsten carbide coating, means you can keep chopping without any loss in performance as the knives wear. What's more, with our innovative shearbar system, it's never been easier to cut high quality silage all season long.

LOWER FUEL CONSUMPTION

The unique design of the knife holders creates a more uniform and bundled crop stream. They also optimise the point of exit for the crop, helping to reduce the overall power demand of the crop flow by up to 20 kW. When you're chopping non stop, day after day, that adds up to significant fuel savings.

MAXIMISE BIOGAS AND LIVESTOCK POTENTIAL

Our cutterhead design gives you much more chopping flexibility: you can use the 40, 48, 56 and 64 knife cutterheads with 1/2 or 3/4 knife configurations for even longer lengths of cut. Totally unique to John Deere, it means you can meet all the needs of biogas, livestock and dairy farmers with a single cutterhead.

HIGH QUALITY SILAGE

KERNEL PROCESSING

The massive throughput of the 9000 Series creates special demands for kernel processing – our XStream KP™ and Premium KP™ handle them with ease.

PREMIUM KP

Our Premium KP is a proven high intensity processing solution that produces excellent forage quality at any length of chop and features Dura Line™ rolls for longer equipment life with more volume.

XSTREAM KP

Together with the renowned experts from Scherer, a global leader in kernel processing roll design, we developed the new John Deere XStream KP for high horsepower. With 250 mm diameter rolls and 50% speed differential it delivers consistently smashed kernels and intensively processed plants regardless of chop length.

Up your processing productivity and consistently achieve smashed kernels and intensively processed plants with the new John Deere XStream KP – shown here with DuraLine saw tooth rolls.

ALL-STAR HEADER PERFORMANCE

HEADERS

For the productivity levels you're looking for from the 9000 Series, only the most advanced headers will do. Our range is designed for high horsepower, radical efficiency and total reliability.

Variable header drive in base synchronises auger speed to LOC for great chopping quality. No matter if harvesting lighter or very heavy windrows, the optional dual header drive adjusts the speed of the pick-up tines independent of the auger matching the ground speed. Making sure no crop gets left behind.

GRASS: NOTHING LEFT BEHIND

In addition to our renowned 6X9 premium pickups, designed explicitly for high-horsepower grass collection, we now also offer the new R Series pick-ups – developed exclusively for John Deere.

6X9 PREMIUM PICK-UPS

MODEL	TRANSPORT WIDTH*	WORKING WIDTH*
639	3 m	2.56 m
649	4 m	3.64 m
659	4.5 m	4.15 m

* All dimensions are nominal dimensions. Actual dimensions may vary from case to case.

R SERIES PICK-UPS

MODEL	TRANSPORT WIDTH*	WORKING WIDTH*
30R	3 m	2.70 m

* All dimensions are nominal dimensions. Actual dimensions may vary from case to case.

6X9 PREMIUM PICK-UPS

The Dura Line™ parts in our 6X9 pick-ups stay in the game longer. In addition to an extra-robust pick-up reel, you get heavy-duty chains and a sturdy auger with wear strips and deck plates that will last four times longer.[^] Also, expect improved feeding at all lengths of cut from the variable pick-up speed feature of the 6X9.

R SERIES PICK-UPS

Equipped with a big 80 cm diameter auger, larger 20 cm auger flights, and 6 tine bars with 6.5 mm diameter tines, the new R Series pick-ups are designed for high throughput. To ensure that you can enjoy full performance for seasons to come, the 30R also features a chainless drive and heavy-duty wear parts that reduce maintenance costs.

[^] Based on internal field test, comparing John Deere wear parts with and without coating.

1 | HIGH-SPEED CUTTING

Fast turning rotors, for a perfect cut even under the most difficult conditions such as wet crops with lots of weeds.

2 | HEADER VERSATILITY

Chop maize and many other crops for feed or biogas production even under tough conditions and cut covering the full working width.

3 | UP WITH DOWN CROP

The integrated low outer pointers make sure that down crop gets picked up perfectly every time.

7 | LUBE FASTER

Our headers feature less lubrication points to make daily maintenance easier and quicker. You've got other things to do.

8 | INSPECT LESS

The main hexagonal shaft in our headers connects all gearboxes and minimises daily inspection requirements.

9 | ROWSENSE™

Manual RowSense and AutoTrac™ RowSense allow you to keep your full attention on the header and spout functions to increase your productivity.

FLEXIBLE, LEGENDARY RELIABILITY

Built by Kemper, a John Deere company, our 300^{plus} and 400^{plus} maize headers are renowned worldwide for high capacity, reliability and low maintenance. With the wide variety of header sizes, you can choose what fits best for you.

TRANSPORT: CONVENIENT AND SAFE

We've made transport efficiency a priority to make sure that you don't lose any time when changing fields. For excellent on road driving comfort, we now offer a comfort support wheel for 300^{plus} and 400^{plus} headers. Part of the weight of the header is carried by a large 360° turning transport wheel. All safety equipment is conveniently integrated so that you leave nothing behind, and automatically folds in for transport so that you don't have to leave the cab to do it manually – when others are still folding, you're already chopping! With several field changes a day, you gain up to half an hour more time to chop.

4 | FLATTER HEADER ANGLE FOR EVEN STUBBLES

Specially shaped cleaners on the underside of the cutting rotors break up sharp edged maize stubble for faster decomposition.

5 | QUICK FIELD CHANGES

The comfort support wheel mounts in 30 seconds – from the cab. All security features are integrated, and lighting connects automatically.

6 | LESS WEAR

Power is transmitted by closed oil bath gearboxes and safety clutches for minimal wear at the driveline parts.

10 | ADVANCED CONTROL

The perfect header position every time, thanks to the active height control of Advanced Header Control (AHC), optionally available with up to 3 sensors.

11 | ATTACH IT FASTER

The multi coupler and the optional integrated quick coupler make attachment and removal a fast and painless process.

COMPACT PERFORMER

300^{plus} HEADERS

Short, compact and with a light-weight small-drum design, the 300^{plus} series is easy on the soil and great for short to medium-height crops.

For the 9000 series, the 300^{plus} is available in 6, 7.5 and 9 meter working widths, which gives you a perfect fit for what you're harvesting most. The row-independent harvesting technology lets you work the field from any side. Thanks to the even length wise feeding the 300^{plus} series is your best choice for perfect chopping quality.

SUPERIOR COVERAGE

Row-independent harvesting technology with fast-running rotors for seamless cutting over the entire width.

SHORT AND COMPACT

The compact design gives you a better view for enhanced road transport safety.

IT'S LIGHTER

We've reduced the overall weight so there's less of it on the front axle. You'll leave the field in better shape with less soil compaction.

WIDE RANGE

The 300^{plus} series features a wide range of working widths. Choose between 6, 7.5 and 9 meter working widths.

ROTARY HEADER 300 ^{plus}		
MODEL	WORKING WIDTH*	TRANSPORT WIDTH*
360 ^{plus}	6 m	3 m
375 ^{plus}	7.5 m	3 m
390 ^{plus}	9 m	3.3 m

* All dimensions are nominal dimensions. Actual dimensions may vary from case to case.

MOUNTING COMPATIBILITY

THROUGHPUT CHAMPION

400^{plus} HEADERS

When you need to harvest lots of high-yield crops fast, you can't do better than our 400^{plus} series.

Designed and built for greatest throughput, the 400^{plus} series uses the big drum design to cut, gather and feed the crop into your forage harvester. Developed with an emphasis on customer value, the 400^{plus} series machines shine when you're looking for more yield, more productivity, and more performance under extreme conditions.

ROTARY HEADER 400 ^{plus}		
MODEL	WORKING WIDTH*	TRANSPORT WIDTH*
460 ^{plus}	6 m	3 m
475 ^{plus}	7.5 m	3.3 m
490 ^{plus}	9 m	3 m

*All dimensions are nominal dimensions. Actual dimensions may vary from case to case.

MOUNTING COMPATIBILITY

460 ^{plus}	□	□	□	□	□
475 ^{plus}	■	■	■	■	■
490 ^{plus}	■	■	■	■	■

■ Recommended

□ Possible

1 | HIGH-YIELD EXPERT

The 400^{plus} is especially designed for harvesting high-yield crops even under very difficult harvesting conditions.

3 | PRIME QUALITY

The plants go fully lengthwise through the header to the feed rolls to achieve a perfect chopping result.

5 | MOVE IT FAST

The double-fold mechanism of the 490^{plus} folds the entire header in about half a minute – and it's on to the next field.

2 | LESS BLOCKAGE

The design with less handover points lowers blockage risk and creates a more direct crop flow for higher throughput.

4 | FULLEST REACH

Get more done faster with the 12-row large drum header of the 490^{plus} and its six equally sized drums.

FULL TRACTION, FULL CONTROL

TYRES & PRODRIVE™

John Deere forage harvesters deliver enormous traction and superior control in all driving conditions – you profit from bigger tyres and ProDrive as standard features.

BIGGER TYRES, BETTER GRIP

With diameters of up to 2.15 m, the 9000 Series features extra big tyres. And at up to 0.5 m it also delivers extremely high ground clearance. Add to this tyre pressure of as low as 1 bar, a reduced overall weight and you have a simple and efficient formula that gives you more traction and less compaction, still allowing you to zip along at speeds of up to 40 km/h on the road.

PRODRIVE – A TRANSMISSION BENCHMARK

ProDrive is the other half of the traction equation, with numerous other benefits. The sophistication of this breakthrough transmission technology stays on the inside – to you it is supremely easy to operate. ProDrive provides automatic shifting across two pre-set speed ranges in which you select a speed that will be maintained continuously, even when you're harvesting downhill on slopes. It could not be simpler: There's no gear lever and no parking brake, just a master control lever you push to move. Braking is just as easy – just pull back the lever and two brake units, and the parking brake engages automatically. While ProDrive gives you all the traction you need, it is also gentle on soft soil. With 4WD if a wheel loses traction, the hydraulic flow is automatically directed to the wheels that still have grip and you keep moving. On softer soil, a speed differential between the front and rear axles prevents the wheels from disturbing the soil when turning.

HIGHEST
GROUND
CLEARANCE
AVAILABLE
ON THE
MARKET

MORE SMILES PER HECTARE

CAB

It's quiet in here. You can focus and relax. You have all your comforts and tech tools at hand to enjoy hectare after hectare of pure productivity. Sit back and smile, you're in a 9000.

SEE MORE CLEARLY

More glass, less obstructions, less reflections, rain or shine, day or night. It's all about a better view of everything.

2 | ON TOP OF THINGS

The higher driving position gives you more control, the centre-cab seat adjusts to you, its air suspension protects you.

3 | INSTRUCTOR SEAT

Take a passenger along, or just fold it away to turn it into a practical workspace.

4 | CONTROL YOUR CLIMATE

Precisely adjust your air conditioning from the CommandARM™.

5 | ERGONOMIC CONTROLS

Perfectly laid out controls with programmable buttons on the hydro handle.

6 | ONE GLANCE, TOTAL INFORMATION

All essential operational data is displayed with extra sharp text and graphics for quick and effortless reading.

7 | STORAGE APLENTY

Lots of space available to store anything you need to bring along, including an optional large refrigerated compartment.

8 | ONE-HANDED CONTROL

All key controls, one multi-function lever: speed, header fold and lift, spout turn and lift, feedroll and header engagement.

9 | CHARGE AND CONNECT

Lots of 12V sockets for charging mobile devices, plus optional Bluetooth to connect to the audio system for calls or music.

10

MAINTENANCE EASE

Enjoy the convenience of lubricating the pick-up from the cab. With AutoLube you'll never again forget a lube point.

Thanks to their unique hard-wearing high-tech coating, Dura Line™ parts help significantly reduce in-season downtime.

SAVING FUEL ON THE ROAD

Getting a forage harvester from field to field on the road is not exactly its most productive time and costs you fuel and money. That's where John Deere engine speed management comes in: it reduces engine rpm during road transport while you maintain a productive ground speed – more fuel efficiency, more savings.

GOOD FOR BUSINESS

The more resources you have available to you, the more you can accomplish, the more you can evolve. That's why everything about the new 9000 Series was designed to help you cut down your cost of operation.

COMPONENTS THAT LAST

In the end, it's about money: When the wear parts of your machine last longer, the machine becomes more profitable. That's why we packed the 9000 Series chock full of ultra-hard wearing Dura Line components throughout the crop flow – shearbars, knife holders, the chute – Dura Line is everywhere to let you go season after season without exchanging wear components.

LONGER SERVICE INTERVALS

Oils and filters in the engine and the hydraulic system need to be changed regularly – that's time and money. But in our case, less of that: change engine oil and filters only every 750 or 1,000 hours depending on the engine – up to 2,000 h for hydraulic oil and 1,000 for hydraulic filters.

POWERGARD PROTECTION PLAN™

STATUS: PROTECTED

When you protect your equipment with a PowerGard Protection plan, your business has the steady machine uptime and nonstop peak performance it needs to thrive.

ALL-IN-ONE

Predictable lifetime costs

MAXIMUM UPTIME

Regular scheduled servicing and maintenance combined with genuine parts ensuring that your machine runs reliably

SAVINGS ON FUEL AND FLUIDS

Regular maintenance optimises fuel efficiency and minimises running costs

HIGHER RESALE VALUE

Transparent Service History

EXCEPTIONAL LIFECYCLE EXPERIENCE

PARTS AND SERVICES

We combine product excellence with an exceptional lifecycle experience to guarantee unmatched performance, maximum uptime and the lowest cost of operation throughout the entire lifecycle of your forage harvester.

JOHN DEERE LIFECYCLE SOLUTIONS

- Latest comfort and performance upgrades

Dura Line means competitive advantage for your business. Looking back on more than 10 years of lasting longer, we guarantee* our Dura Line liners to last for 3,000 engine hours or 5 years of use.

*Guarantee excludes shearbar, knives, knife holders, smooth roll scrapers. Ask your dealer for details.

COMPONENTS THAT LAST

To prevent downtime right from the start, we pack our forage harvesters full of ultra-hard wearing Dura Line™ components throughout the crop flow – shearbars, knife holders, the chute – Dura Line is everywhere to let you go season after season without exchanging wear components. Dura Line liners will save you cash since this unique coating will last four times longer.^

LAB-TESTED PROOF

To examine the quality of our wear parts, we took John Deere spout flaps and their competitors to a lab and sandblasted them to simulate wear. The result: John Deere Dura Line spout flaps last up to four times longer.^

^ Based on internal field test, comparing John Deere wear parts with and without coating.

MAXIMUM UPTIME WITH EXPERT ALERTS

At your request, you can opt-in to use our unique uptime Expert Alerts technology, allowing your John Deere dealer to remotely monitor the condition of your machine to identify potential machine faults and fix them before they can impact your work. When an issue is detected on the machine, you'll be contacted immediately to receive the proactive support you need to minimise downtime risk and allow you to continue to focus on your work in the field.

WE WILL KEEP YOU MOVING

Your 9000 Series SPFH comes with a dealer network that is there for you 100% - with answers, parts and services that will make sure that you get the very best from your machine. You can count on it.

CONNECTED SUPPORT

With JDLink™ and Service ADVISOR™ Remote, your dealer can remotely assist you with machine setup or trouble shooting much quicker and more cost effectively.

KEEP MOVING

When you need a part, you need it fast. Your dealer keeps most of them in stock. For everything else, the professional John Deere logistics network brings it in promptly.

↑ | UPGRADE

ALWAYS UP-TO-DATE

Our SPFH comes packed with future-proof technology that allows you to adapt your machine to your changing needs with our growing range of performance and comfort upgrades. Continue to take advantage of the full potential of your machine throughout its lifecycle by adding solutions like our HarvestLab™ Retrofit-Kit.

FAST AND FLAWLESS

GUIDANCE AND MACHINE AUTOMATION

Enjoy automatic hands-free guidance with John Deere AutoTrac™ – the essential feature for high-volume harvesting operations when you need to fully load the harvester hour after hour.

Apart from ensuring that you get a full header width with every pass, AutoTrac saves fuel by eliminating missed or skipped sections and lets you consistently harvest at higher speeds for hours. It also has the added benefit of taking away the stress of harvesting tall maize and other such row crops – you can relax and focus on other essential tasks and processes for cutting excellent silage. To get started with automatic AutoTrac guidance, take a look at our StarFire™ receivers for superior signal range and stability.

HIGH-EFFICIENCY HARVESTING

Exclusively designed for harvesting maize, Manual RowSense™ is an electro-mechanical system to precision-align the harvester with the crop rows and field contours, however irregular they may be. Easy to operate via a single button on the multi-function control lever, Manual RowSense will work in row spaces from 50 cm up to 85 cm.

AutoTrac RowSense is leading-edge technology that combines data from row sensors with satellite position data from the StarFire Receiver. Whether your challenged with down maize, curves or uneven row spacing: AutoTrac RowSense always keeps you in the right row while maintaining speed and reducing stress.

TAKING THE LEAD – MACHINE SYNC

Using Machine Sync, a follower-tractor immediately mirrors speed and heading changes of the forage harvester so that drivers can fully concentrate on trailer filling. For example, once the back of a trailer is filled, the forage harvester driver can nudge the tractor to the next desired position without having to communicate new positioning via CB radio or hand signals.

RELAX, FILL, REPEAT – ACTIVE FILL CONTROL

John Deere Active Fill Control utilises a stereo camera to control the rotation and flap position of the spout automatically. The system can actively track transport vehicles and aim the crop from the best position to execute a desired fill strategy, also in rear-unload conditions when opening up a new field*. Meanwhile, you can relax and bring your focus to overall harvesting optimisation and machine operation.

BETTER INFORMATION, MORE VALUE

HARVESTLAB™ 3000 FORAGE ANALYSIS

Take real-time forage information from the HarvestLab 3000 sensor and make in-field adjustments to create the best product you have ever delivered – on the fly, accurately and reliably.

MULTI PURPOSE DEVICE

You can use HarvestLab 3000 on forage harvester, or as a mobile laboratory.

AWARD WINNING TECHNOLOGY

HarvestLab technology has proven itself in the field for years, and is a consistent favourite on the awards circuit.

MOBILE INTELLIGENCE

THE EVERYWHERE LAB

You can use the John Deere HarvestLab™ 3000 sensor as a stationary laboratory unit or a mobile device powered by a vehicle to obtain instant information that allows you to manage your forage and feedstuff heterogeneity better.

HarvestLab 3000 also pays off after forage harvesting season: Take it off the machine to use the sensor as a stationary unit which measures the ingredients of your ensiled material from the clamp in order to optimise your feed rations.

Daily analysis is critical for the best heterogeneity management – ensuring proper bunk management, feed rationing and livestock health. Save on unnecessary supplements while attaining higher yields in beef, dairy or biogas production, and ultimately higher business profitability.

INTEGRATED CROP DOSING

HarvestLab 3000 sensor readings also work beautifully with another option of the 8000 and 9000 Series: the fully integrated ADS Twin Line system doses silage additives based on time, harvested tonnes or on dry matter tonnes using HarvestLab 3000 sensor readings. Supplied from two different tanks, the dosing nozzles are positioned at air intake of the crop

accelerator and allow you to choose either fixed or variable dosing rates based on moisture readings from HarvestLab 3000. The twin tanks allow you to add two different inoculants together, or apply them at different times, giving you the flexibility to adapt to each specific job's needs.

THE SECRET TO GREAT SILAGE

HARVESTLAB™ 3000 ON A FORAGE HARVESTER

HarvestLab 3000 simultaneously measures the dry matter and various constituents of harvested crops. Its sensor uses near-infrared-reflectance (NIR) technology that takes over 4,000 readings per second to produce instant and highly accurate data on the go. Since its introduction in 2008, thousands of HarvestLab units have been operating around the world, with excellent performance even in challenging field conditions.

The site-specific data from HarvestLab 3000 helps crop growers improve their field nutrient management much better than from a single sample sent to a lab. On a forage harvester, HarvestLab 3000 enables automated length of cut adjustment depending on dry matter content, ensuring optimum silage compaction and conservation. Livestock and dairy farmers profit from real-time detection of changes in feed quality and better silage additive control. Biogas producers like HarvestLab 3000 for the accurate information they get on the crop quality they buy.

CROP TYPE	MOISTURE/DRAY MATTER (DM)	CRUDE PROTEIN	STARCH	ADF	NDF	uNDF*	ASH	SUGAR

Alfalfa/haylage	■	■	—	■	■	■	■ **	■
Whole Crop Silage / small grain silage	■	■	■	■	■	■	■	■

*Only for ensiled products in stationary mode

**Not in stationary mode

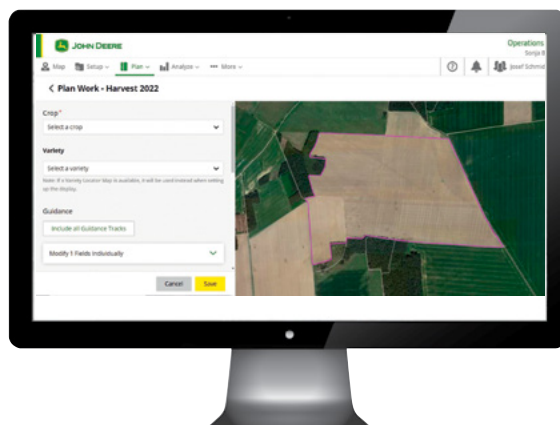

CAPABILITIES AT ONE GLANCE

- DM, protein, starch, fibre, sugar, ash, metabolic analysis on-the-go
- Automatic length of cut adjustment
- Precise dosing of silage additives
- Measuring results also accessible via the Operations Center

WORK PLANNER

The new work planner tool lets you set up your work in the John Deere Operations Center in advance and send it wirelessly to any JDLink™ connected machine. No delays, no mistakes, and always properly documented.

YOUR GATEWAY TO BETTER BUSINESS DECISIONS

You're managing a complex enterprise. That's why optimising the overall business depends on being well connected to your ongoing operations.

The John Deere Operations Center lets you turn agronomic insights into smart decisions that produce maximum yields at the highest quality while reducing your input costs. Plan your tasks for the upcoming season with a structured overview that makes it effortless to create display set-up files and work orders. Your documentation data is automatically uploaded from your in-cab display to your personal Operations Center account as tasks are completed. Now you can access your data from any internet-capable device and visualise it as a structured timeline allowing you to view your mapping or compare different map layers like yield, dry matter, protein, and more. Easily share specific data with your advisors and produce comprehensive clients reports with just a few taps or clicks.

+ YOUR BENEFITS

- All info in one centralised location, nicely structured and easily accessible
- Gain insights for smart, fact-based decisions
- Leverage numerous additional agronomic tools for further data processing and analysis
- Automated data transfer between machine and office in near real-time

John Deere Operations Center – Allocate exact field locations for the next tasks, track the work progress of your machines, assign work orders to your operators, view “as-applied” maps automatically sent from the field and create, analyse and share application reports with partners and customers.

SPECIFICATIONS

MODEL	9500	9600	9700
ENGINE			
Engine power (rated) @1,800 rpm (ECE R120, kW(hp))	515 kW (690 hp)	552 kW (740 hp)	589 kW (789 hp)
Engine power (max @1,800 rpm (ECE R120, kW (hp))	563 kW (755 hp)	579 kW (776 hp)	607 kW (814 hp)
Manufacturer	John Deere		
Type	JD18X		
Displacement	18.0 L		
Cylinders	In-line six		
Fuel system	Common rail plus four valves		
Emission regulation	Final Tier 4 / EU Stage V		
Air compressor	Optional		
Fuel tank capacity	1,500 L		
DEF tank capacity	NO DEF – 0 L		

MODEL	9800	9900
ENGINE		
Engine power (rated) @1,800 rpm (ECE R120, kW(hp))	640 kW (858 hp)	713 kW (956 hp)
Engine power (max @1,800 rpm (ECE R120, kW (hp))	640 kW (858 hp)	713 kW (956 hp)
Manufacturer	Liebherr	
Type	D9512 A7 04	
Displacement	24.2 L	
Cylinders	V 12	
Fuel system	Common rail plus four valves	
Emission regulation	Final Tier 4 / EU Stage V	
Air compressor	Standard	
Fuel tank capacity	1,500 L	
DEF tank capacity	102 L	

SPECIFICATIONS

MODEL 9500-9900	
DRIVELINE	
Ground drive	ProDrive™ autoshift transmission, differential lock (automatic or manual), automatic wet brake system.
	Engine rpm on road: 1,300-1,800 rpm for 9500-9700 / 1,200-1,800 rpm for 9800-9900
Main hydraulics	Load sensing
Main clutch	Dry clutch
Number of clutch discs	Two discs
Main driveband	Reinforced with Kevlar inserts
ELECTRIC SYSTEM / HYDRAULIC SYSTEM	
Type/voltage	12 V / 24 V
Battery quantity/capacity	3 x 154 amp-hr
Alternator	12 V-200 amp // 24 V-140 amp
Hydraulic system capacity	50L
GROUND DRIVE	
Maximum transport speed	40 km/h
Rear axle type	Hydro-mechanical 4WD
Automatic wet brake system	Standard
Engine rpm management	Standard
HARVEST CHANNEL	
Width	Wide body channel
HEADER CONNECTION	
Infinitely variable header drive	Standard
Lateral pivoting frame	Standard
Multi coupler	Standard
Auto PTO coupler	Optional
Header height and float pressure control	Standard
Hydraulic actuated lateral header tilt	Optional Advanced Header Control (AHC)
FEED ROLLS	
Feed roll frame opening	Swing away, 37-45 degree (angle)
Number of feed rolls	Four
Metal detector	Standard
Stone deflector	Optional
Heavy duty feed roll	Standard
Feeding channel width, front	830 mm
Hydro feedroll drive with infinite variable length of cut	Standard
CUTTERHEAD	
Cutterhead width / diameter	850 mm / 670 mm
Speed at rated engine speed	1,170 rpm / 1,350 rpm
Number of knives	40 - 48 - 56 - 64
Knife types available (crop)	Straight (grass/universal)
	Curved (maize)
Shearbar options	Grass, maize, Dura Line™ maize, Dura Line Plus

SPECIFICATIONS

MODEL		9500-9900
LENGTH OF CUT		
40 knife cutterhead		7-25 mm LOC in 1 mm steps/ 1,170 rpm
48 knife cutterhead		6-21 mm LOC in 1 mm steps/ 1,170 rpm
56 knife cutterhead		4-18 mm LOC in 1 mm steps/ 1,170 rpm
		4-16 mm LOC in 1 mm steps/ 1,350 rpm
64 knife cutterhead		3-16 mm LOC in 1 mm steps/ 1,170 rpm
		3-14 mm LOC in 1 mm steps/ 1,350 rpm
KNIFE SHARPENING SYSTEM		
Reverse rotation		Yes
Sharpening control		Remote from cab
Sharpening modes		Grinding and finishing
KERNEL PROCESSOR		
Available KP types		Premium KP, XStream KP
Quick KP removal		Optional crane with remote controlled electric hoist
KERNEL PROCESSING OPTIONS		
PREMIUM KP™ (NOT AVAILABLE FOR 9900)		
Housing		Standard KP housing
Lubrication		Grease
Roll diameter		240 mm
Speed differential		32% (standard) 40% (option)
Standard sawtooth		118/118
Dura Line™ sawtooth		118/118
High intense Dura Line sawtooth		110/144
Wholecrop sawtooth		178/178
XSTREAM KP™		
Housing		Heavy duty housing
Lubrication		Pressurised oil
Roll diameter		250 mm
Speed differential		50% (standard)
Dura Line sawtooth		110/145
Dura Line X-Cut		110/145 Sawtooth with additional spiral groove
Wholecrop, sawtooth		145/165
CROP ACCELERATOR		
Rotor width / diameter		620 mm / 560 mm
Number of blades		10
Rotor speed		1,890 rpm
SPOUT		
Rotation		210°
Reach from centre line (optional)		4.73m (5.87m, 6.71m)
Working height (maximum)		Height to spout: 6.60 m
Spout camera		Optional
Active Fill Control		Optional

SPECIFICATIONS

MODEL 9500-9900	
CAB	
Panoramic view windows	Standard
Touch screen display	Standard
Refrigerator	Optional
Bluetooth	Optional
PRECISION AG TECHNOLOGY	
Yield monitoring	Harvest Monitor™ optional
Documentation	Harvest Doc™ optional
Crop analysis	HarvestLab™ 3000 optional
Length-of-cut control based on crop	AutoLOC™ optional with HarvestLab 3000
Assisted steering	AutoTrac™ or Manual RowSense™ optional AutoTrac RowSense and Machine Sync

MODEL 9500-9900		
VEHICLE		
FRONT TYRE OPTIONS		
MACHINE WIDTH	FRONT TIRE	REAR TIRE

VEHICLE DIMENSIONS*		
Transport length (without header)	6.6 m	
Transport width (without header)	3.2 m - 3.49 m	
Transport height (to cab roof)	Below 4.0 m	

*All dimensions are nominal dimensions. Actual dimensions may vary from case to case.

NOTHING RUNS LIKE A DEERE

As technology like the 9000 Series evolves, and as your business evolves, you can count on one thing: we're there when you need us – for advice, to solve a problem, or for a part. Reach out, we'll be there with technicians who are factory trained, ready to go to work for you, using only genuine John Deere parts and products.
